

Chhatrapati Shivaji Maharaj Mumbai International Airport Witnesses Positive Boost in Passenger Traffic During The Weekends

Higher domestic flight capacity and ease of domestic travel restrictions have accelerated passenger traffic from Mumbai International Airport. Witnessing growth at an accelerated pace, the airport observed a spike in air traffic with passengers travelling during the weekend and registered an increase of approximately 59% in passenger traffic in July 2021 compared to June 2021.

Mumbai International Airport has played host to approximately 1.1 million passengers over 11,400 flights across domestic and international destinations in the month of July 2021. Among these passengers, the airport witnessed a capacity of approximately 0.5 million passengers over 4,000 flights only during the weekends, while June month observed 0.3 million passengers over 2,700 flights during the weekends. The gradual opening of offices is complemented with an increase in the flight capacity, which has been the other factor for sequential growth from Mumbai International Airport. Weekends saw most passengers travelling to Delhi, Bengaluru and Hyderabad destinations from Mumbai International Airport in the domestic sector and Doha, Newark and Dubai destinations in the international sector.

While the passenger traffic is increasing aggressively, most Indian states and international countries require a negative RT-PCR certificate. To make the passenger travel hassle-free, Mumbai International Airport has established over 30 counters of testing facilities at Terminal 2 for international and domestic passengers. Mumbai International Airport is continuously working towards its passengers' wellbeing and safety and ensuring it assists them with high-quality standards and a world-class travel experience.

About Mumbai International Airport Limited (MIAL):

Mumbai International Airport Limited (MIAL) is managed by Adani Airport Holdings Limited (AAHL), a subsidiary of Adani Enterprises, the flagship company of the globally diversified Adani Group. MIAL is a Public-Private Partnership (PPP) venture between AAHL, holding a majority stake of 74%, and the Airports Authority of India, holding the rest 26%. AAHL aims to converge India's biggest cities in a hub and spoke model through the Group's proven strength in developing and managing complex transport & logistics hubs.

With a strong understanding of modern-day mobility requirements, the Adani Group's vision for MIAL is to reinvent Mumbai International Airport as India's biggest aerotropolis, where the traditional airport nucleus of passenger and cargo infrastructure will be reinforced by interdependent clusters of commercial and residential infrastructure to create the nation's busiest airport ecosystem.

MIAL has been further envisioned as a global air-travel focal point where domestic and international flyers actively engage in business and leisure supported by metropolitan expansion that catalyses aviation-linked businesses and employment opportunities. At MIAL, we intend to create distinctiveness with an experiential offering that puts Mumbai first.
